Please read this user manual carefully, it contains instructions for the correct assembly of the KIT. Please refer to the website www.goblin-helicopter.com for updates and other important information. Thank You.

It is recommended to use a smaller motor pulley with the new rotor size. Starting from a typical G380 setup, you have to consider a motor pulley with 1 or 2 teeth less for G420.

Assemble the components here below following the manual of the original Kit:

Refer to the following instructions to assemble the tail belt guide system. This solution is necessary with the new front tail pulley.

Tail Belt Idler assembly
Tail Belt Tensioner Arm assembly

NOTE:
Lock the tension group in this position (Position without preload).

Orientation H0577

Shims Ø8xØ14x0.2mm (HC228-S)
Add or remove shims to get approximately 0.2-0.4mm play.

Front Tail Pulley (H0620-S)
